## Skills

**Frontend**: React | Angular | React Native | NativeScript | JavaScript | TypeScript | jQuery | Bootstrap | Jasmine |Adobe Creative Cloud | Figma
**Backend**: Java | Spring | Python | C | NodeJS | Express | PHP | SQL | JUnit | Gradle | MockMVC | Mockito | OpenAPI |Drools | Apache Tomcat
**Development Tools**: Git | Jenkins | Docker | Eclipse | Jupyter | Expo | Tableau | SonarQube | OpsGenie | Dynatrace | LaunchDarkly | Snowflake

## Experience

| Software Developer | Sentry Insurance | *Madison, WI* | **09/2021 - Current** |
|---|---|---|---|

- Part of the PL Portals team focused on the maintenance and **full-stack** feature development of customer-facing applications related to Sentry's personal line brands, Dairyland Insurance and Harley-Davidson Insurance.
- Revamped UI of a customer web application that gets over 250k monthly users using **Handlebars JS**, **jQuery**, and **Bootstrap**, ensuring seamless integration with a **Spring Framework** backend for core functionalities like policy purchasing.
- Enhanced customer experience by implementing critical features, such as auto-pay enrollment editing and insurance claim submission with file uploads, across **Angular** web and **Nativescript** mobile apps.
- Integrated third-party vendor for multi-factor authentication in customer and agent applications, improving account security and user configuration capabilities. This secures the 10+ million monthly logins of our team-owned applications.
- Support production applications, addressing alerts promptly using **OpsGenie** and maintaining application security by updating dependencies.
- Implemented system metrics tracking to guide business decisions, developing a containerized batch application for data lake ingestion and integration with **Snowflake** for analytics and **Tableau** dashboards.
- Integrate newly developed REST APIs from other parts of the organization to improve performance and delivery pipeline.

| Application Engineer Intern | BlackRock | *San Francisco, CA* | **07/2020 - 08/2020** |
|---|---|---|---|

- Developed a **Tableau** Dashboard to assist portfolio managers in visualizing model data and identifying anomalies, facilitating informed decision-making.
- Automated data extraction from CSV files using **Python** with **Pandas** for efficient statistical analysis and data processing.
- Implemented a **Jenkins** job to generate daily CSV reports, enabling real-time updates and dynamic data visualization on the Tableau dashboard for enhanced insights and monitoring.

| Software Engineer Intern | Northwestern Mutual | *Milwaukee, WI* | **06/2019 - 09/2019**<br>**06/2018 - 08/2018**<br>**06/2017 - 08/2017** |
|---|---|---|---|

- Conducted data analysis on corporate Skype usage data to optimize server power usage.
- Spearheaded the development of a front-end prototype for an internal **React** web application, enabling quantification of financial risk associated with services and applications in an accessible format.
- Modernized a Flash game using contemporary web technologies like **HTML**, **CSS**, **JavaScript**, and **jQuery**, enhancing user experience and accessibility.

## Education

| Bachelor of Science | University of Wisconsin - Madison | *Madison, WI* | **09/2017 - 05/2021** |
|---|---|---|---|

- Major in **Computer Engineering** and **Computer Science**, Certificate in **Digital Studies**
- Rockwell Automation Scholarship Recipient | Prestigious full scholarship from Rockwell Automation for select undergraduate engineering students
- LEED Scholar | Part of the *Leader in Engineering Excellence and Diversity* group on campus comprised of high-achieving students

## Projects

- **Company Website** | *La Cosecha Tortilleria Company* | 10/2021 - 12/2021
  - Designed and created a **Shopify** website for a local business in Madison, WI
  - Created an **Adobe XD** design, keeping in mind design principles to motivate users to interact with the company
- **Risk Assessment and Aggregation Application** | *Northwestern Mutual* | 06/2018 - 08/2018
  - Developed a **React** web application that showed a dependency graph for company applications and services
  - Implemented real-time risk aggregation and calculation for business applications
- **The Longevity Game** | *Northwestern Mutual* | 07/2017 - 08/2017
  - Led front-end development efforts for a web app game, focusing on design, animations, and implementation.

## Leadership Experience

- **Scrum Master |** *Sentry* **|** 1/2022 - 08/2023
  - Orchestrated effective sprint execution and facilitated agile scrum ceremonies including Daily Stand Up, Sprint Retrospectives, and plannings.
  - Ensured team alignment with agile principles and promoted continuous improvement through feedback and adaptation.
- **UW-Madison Memes for Milk-Chugging Teens Page Admin |** *UW-Madison* **|** 8/2018 - 5/2021
  - Managed a popular social media page, leveraging **Adobe Creative Cloud** proficiency to create and share humorous and relatable content with over 30,000 followers.

## Others

- **Language:** I speak **Spanish** fluently. This proficiency has proven instrumental in ensuring that the user experience for Spanish-speaking users aligns with that of English-speaking users when developing front-end applications.
- **Interests:** Photography, Linguistics, Coffee, Latest tech, Running, Weight lifting
